Brosmed embrace life

VascuGlide

Microcatheter System

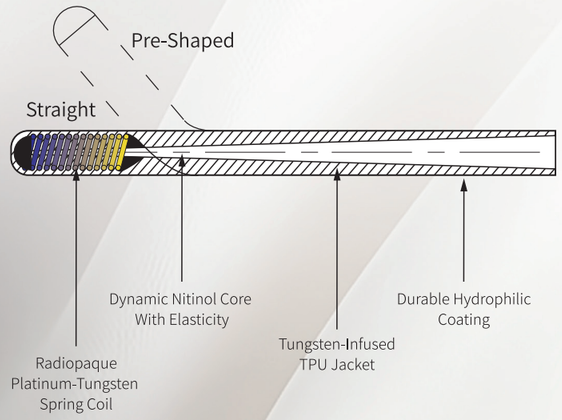

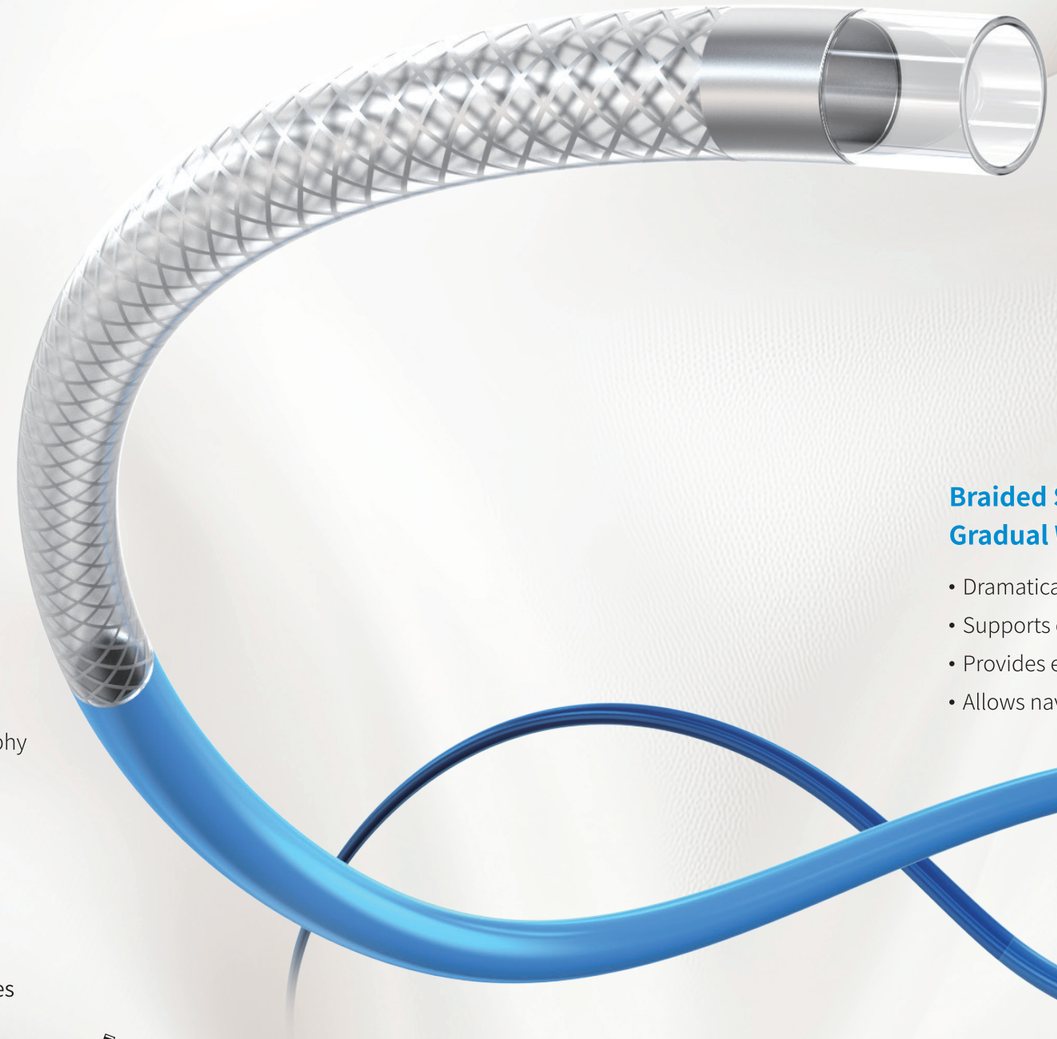

Glide Across Tortuosity

VascuGlide Microcatheter System

VascuGlide Microcatheter System is intended for the infusion of contrast media into peripheral blood vessels, drug infusion in intra-arterial therapy and the infusion of embolic materials for hemostasis.

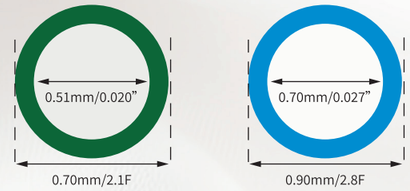

Preloaded Guidewire Design to Maximize the Efficient Delivery

Thin-wall Design, Large Inner Lumen — Enabling efficient Embolization and Smooth Delivery

- Significantly Reduces the Risk of Vessel Damage with Equivalent Media
- DMSO Compatible
- The Inner PTFE Layer Facilitates Smooth Delivery of Embolization

Optimal Visibility to Enhance Safety and Procedural Efficiency

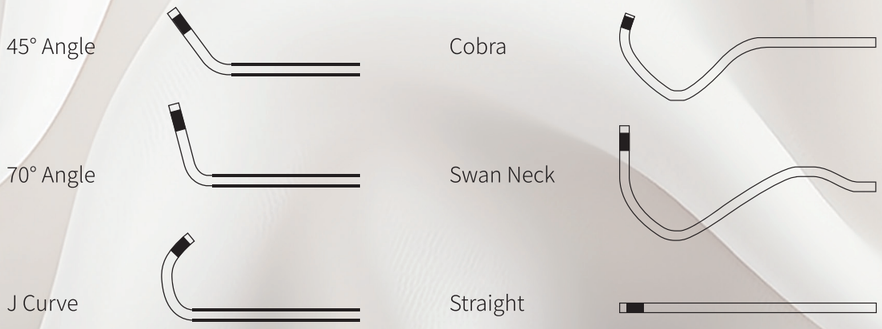

- 1.0 mm Radiopaque Pl/Ir Marker for Optimal Visibility
- Suitable For Superselective Angiography

Braided Structure Design with Gradual Weave Technology

- Dramatically improves trackability and pushability through tortuous anatomy
- Supports contrast injection pressures up to 750 psi
- Provides excellent kink resistance and distal flexibility
- Allows navigation through various peripheral vessels

Pre-Shaped Catheter Tips with Outstanding Shape Retention Performance

6 Available Catheter Tip Shapes

Various Configurations to Expand Your Options in Access & Embolic Delivery

- Preloaded Guidewire (inch): 0.018/0.021
- Effective Length (cm): 120/130/150/170/180/200
